

## MyQ & Power BI

A BUSINESS ANALYTICS SOLUTION THAT CAN CONNECT TO MORE THAN 70 COMPANY DATA SOURCES AND TURN INFORMATION INTO INTERACTIVE VISUALS.

ONE OF THESE SOURCES CAN BE THE MYQ CENTRAL SERVER DATABASE, YIELDING A CLEAR AND COMPREHENSIVE IDEA OF THE ORGANIZATION'S PRINT, SCAN AND COPY ACTIVITY, AND INFORMING BETTER COST MANAGEMENT.

I get automatic MyQ reports every Monday.

### WHY USE POWER BI FOR MyQ REPORTING:

- ☒ Visualize your printing reports and share actionable insights with managers to refine printing policies and cost management.
- ☒ Understand your print costs and analyze print, copy or scan jobs using a wide range of charts or dashboards.
- ☒ Financial departments can easily connect the MyQ central server database to their company's BI software, and match reporting on printer fleet activity to the rest of the company's ERP system reports.
- ☒ Reports can be created to match any requirements – it is possible to create them manually, or use a Power BI template by MyQ to generate reports more quickly.
- ☒ MyQ templates are available for either a MyQ Embedded Database or an SQL server.

Power BI reports are **interactive** – change the date range and set your own combination of parameters (e.g. mono pages printed on specific printers). Any changes are visible straight away.

MyQ customers should have full and convenient access to their database and the data contained at all times, in any form they choose. Not only does MyQ support Power BI, but also **other reporting tools and applications for data processing**, from extractions into MS Excel all the way to live imports into the company's ERP system (like SAP), etc.

Power BI features a powerful dashboard that can be customized to show a business's financial data, HR turnover, economic forecasts, and among these also **printer fleet costs** and consumption.

The dashboard can be modified to contain a model of the company's premises with the locations of all MFPs, or a user data module for **COVID-tracking purposes**, to show which MFPs a specific person used within a certain time frame.

## Choose an Edition that fits your needs:

### ENTERPRISE

EDUCATION AND  
GOVERNMENT EDITIONS  
UPON REQUEST

- ✓ Quick Deployment
- ✓ Device Management
- ✓ Mobile Print
- ✓ Secure Print
- ✓ Personalized Device UI
- ✓ Scanning Workflows
- ⊗ Advanced Workflows & Document Processing
- ✓ Software Updates
- ✓ Software Assurance\*

### ULTIMATE

DIGITIZE YOUR OFFICE WITH  
ADVANCED WORKFLOWS

- ✓ Quick Deployment
- ✓ Device Management
- ✓ Mobile Print
- ✓ Secure Print
- ✓ Personalized Device UI
- ✓ Scanning Workflows
- ✓ Advanced Workflows & Document Processing
- ✓ Software Updates
- ✓ Software Assurance\*

**MyQ Enterprise** – features a **fully personalized printer home screen**, which only displays functions the user needs. Improve efficiency with **powerful scanning workflows & OCR**, and enhance document security with the **Pull Print Feature**, which allows the release of print jobs only upon authentication at the MFP.

**MyQ Ultimate** – excellent choice for organizations set on **digitizing their paper trail**. MyQ Ultimate builds upon the MyQ Enterprise Edition by adding first-class **document processing options** and single-click **automatic workflows** that save users massive amounts of time by capturing delivering their data straight to the desired destination.

MyQ Ultimate also features barcode operations, annotations, digital signatures, zonal redaction, metadata options and more.
