

The Combined **POWER** of Epson and MyQ

MyQ constantly improves its Embedded application for Epson devices, bringing users worldwide increased efficiency, flexibility and security.

5 reasons why you need to start using MyQ today!

1. **EASY INSTALLATION, CONFIGURATION & MANAGEMENT**
 - Remote installation
 - Automated printer discovery
 - Admin dashboard
 - Device monitoring
2. **PERSONALIZATION**
 - Personalized panel UI
 - Integrated device functions (Scan, Copy, Fax)
 - Theme editor
3. **ACCOUNTING AND REPORTING**
 - Projects, quota & credit accounting
 - Cost centres and Group accounting modes
 - Reporting and cost management
 - User policies
4. **FLEXIBILITY WITH MOBILE PRINT**
 - Mobile Authentication for Pull Print
 - Job management with MyQ Mobile App
 - BYOD Printing
5. **AVAILABILITY AND RESILIENCY**
 - Client spooling
 - Failover print

Starting with MyQ X 8.2 (LTS), MyQ's web UI for users and system administrators complies with **WCAG 2.1 standards of web accessibility**, level AA, as certified by BITV.

* As we are constantly improving our software, please contact your MyQ Certified Partner/Account Manager for the latest information about version capability.

Login Options

MyQ allows users to authenticate their devices using various methods, including their ID Card, PIN Code and even by reading a QR Code using their mobile phone. Once logged in, users can release or reprint jobs **contactlessly**.

History & Favorites

How many times have we printed something, closed down our laptop and then needed to print it again? With MyQ, users can find their last printed jobs on the MFP panel and choose to print them again or indeed **mark these as favorite**, which will allow them to reprint these jobs at their convenience in the future, without needing to search for the original document.

Scan to Me

In order to increase the efficiency of the user, once logged in to the Epson MFP, MyQ gives the user **"One Touch"** access to the Epson Scan App, where they can send files straight to their registered e-mail address with minimal interaction.

Advanced Accounting & Reporting

MyQ X offers customers **advanced project, credit and quota accounting options**. Accounting modes are available either as standard Group Accounting or advanced Cost centers. Users can recharge their credit through an internal voucher system, but also external payment providers. Detailed reports are available in MyQ X as a standard, or they can be customized using other tools (MS Excel, BI tools, etc.).
