

The Combined **POWER** of Toshiba and MyQ

MyQ has moved away from session-based to job-based architecture, which dramatically improved accounting, as it reflects individual jobs instead of individual log-in sessions.

5 reasons why you need to start using MyQ today!

1. **EASY INSTALLATION, CONFIGURATION & MANAGEMENT**
 - Remote installation
 - Automated printer discovery
 - Admin dashboard
 - Device monitoring
2. **PERSONALIZATION**
 - Personalized panel UI
 - Easy Scan function, incl. advaced parametres and OCR
 - Integrated device functions (Scan, Copy, Fax)
 - Theme editor
3. **ACCOUNTING AND REPORTING**
 - Projects, quota & credit accounting
 - Cost centres and Group accounting modes
 - Reporting and cost management
 - User policies
4. **FLEXIBILITY WITH MOBILE PRINT**
 - Mobile Authentication For Pull Print
 - Job management with MyQ Mobile App
 - BYOD Printing
5. **AVAILABILITY AND RESILIENCY**
 - Client spooling
 - Failover print

Starting with MyQ X 8.2 (LTS), MyQ's web UI for users and system administrators complies with **WCAG 2.1 standards of web accessibility**, level AA, as certified by BITV.

Secure Login

MyQ allows users to log in to devices using various methods and two-factor authentication. Login methods include ID card login, entering a PIN code, and even reading a QR code using the MyQ mobile app. Once logged in, users can release or reprint jobs **without touching the printer.**

Advanced Accounting and Reporting

MyQ system offers customers advanced **project, credit and quota accounting options.**

Accounting modes are available either as **standard Group Accounting or advanced Cost centers.** Credit can be recharged through an internal voucher system, but also external payment providers. Detailed reports are available as templates or can be customized, and they are connectible with BI tools.

Personalization

The device's panel screen can be completely personalized in the MyQ UI, so that users have **quick access to predefined functions** like one-click scanning to their e-mail, advanced scanning options incl. custom parameters with metadata, OCR options or the device's native copy or fax functions. Admins can also explore the Theme Editor for more creative customization.

My Jobs

Users can modify various printing options on the device panel or in the **MyQ X Mobile Client.** They can select a specific job from the job list, change the number of copies, decide between color/mono and duplex/simplex, mark jobs as a favorite, or reprint jobs from history.
